

K-12 Virtual Education Services

40+ Education Providers • 5,000+ Courses • 45+ Subject Areas

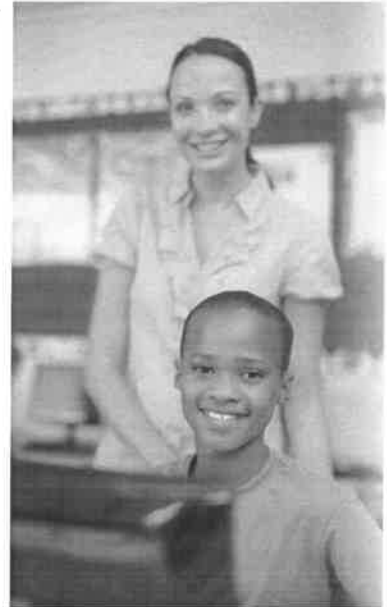

The Educere Experience

While the access to virtual education programs from nearly 50 Education Providers throughout the world is central to Educere's services, it is our personalized learning approach that schools have come to rely upon.

To satisfy the individual needs of students, Educere joins the touch of our Personal Learning Coach™ with the leading edge technology of edtell™. Together, these exclusive resources provide the capacity for Educere to offer unique support at all points of the virtual education experience.

At the onset of each school's relationship, Educere assigns a Personal Learning Coach™ as the single point of contact for the school, student and parent. We immediately begin collaborating with the school and student/parent to pinpoint the most appropriate virtual education programs. The Personal Learning Coach™ is available via email and a toll-free number to provide support during registration and throughout the entire virtual education experience.

Once the school selects the appropriate program for its students, edtell's easily delivered education tools are utilized to customize a virtual edprogram™ to be shared with the school's education community. The edtell™ published and hosted website includes comprehensive program and registration information and is easily linked to the school's website.

After the program is announced, enrollment is carried out using edtell's turnkey registration solution, supported by the Personal Learning Coach™. Upon receiving the online registration of a student, Educere provides confirmation to all constituents included in the registration and coordinates the registrant's enrollment with the participating education provider.

Once the registrant is enrolled in a program, the Personal Learning Coach™ helps the student acclimate to the virtual course(s) using the edtell™ communication tools. At the moment the program is available, the Educere Welcome Email and Call provide essential information about the student's course, including deadlines, course access and instructor contact information, and academic advice to help the student stay on track. Though not a tutor, the Personal Learning Coach™ actively supports the student, parent and school throughout the entire virtual education experience. Using edcalls™ and edmail™ academic reporting, the Personal Learning Coach™ provides recurrent progress updates to promote student engagement in the coursework.

At the program's conclusion, the Personal Learning Coach™ distributes an official final grade report via email to the student, parent and school.
