Health Education

The Board is committed to a sound, comprehensive health education program as an integral part of each student's general education. At a minimum, the health education program meets the requirements established by State law and includes instruction in nutrition; drugs, alcohol and tobacco, including electronic smoking devices; venereal disease; **annual developmentally appropriate child sexual abuse prevention (grades K-6)**; personal safety and assault prevention (grades K-6); **developmentally appropriatedating violence prevention and sexual violence prevention**(grades 7-12); prescription opioid abuse prevention and anatomical gifts (organ and tissue donation).

The District provides at least one hour or one standard class period per year for each of the following to students in grades 6-12: evidence-based suicide awareness and prevention; safety training and violence prevention and evidence based social inclusion instruction. The District may utilize student assemblies, digital learning and homework to satisfy these requirements.

The District complies with all statutory requirements for curriculum and materials used for instruction, parental notice, right to review materials and any applicable parental opt-out provisions provided under State law.

The Board believes that an opportunity for effective health education lies with the public schools because of the opportunity to reach almost all students at an age when positive, lifelong health, wellness and safety habits may be instilled.

~~The health education program emphasizes a contemporary approach to the presentation of health, wellness and safety information, skills and knowledge necessary for students to understand the functioning and proper care of the human body and tools for recognizing the characteristics of healthy relationships and the warning signs of dating violence.~~

In an effort to promote a relevant approach to the instruction of health education, the Board continues to stress the need for curricular, personnel and financial commitments to ensure a health education program of high quality in the public schools.
